Design Sprint Challenge was organized by IncubatINDX which was a Hackathon event which aimed at encouraging students studying in 9th-12th to think innovatively to solve real life problems. Their initiative also aimed to ignite the spirit of entrepreneurship in the students at a early age. The 3 challenges included-

- Opening schools post this pandemic in a socially-distanced
- Ways for spotting fake news easily
- How robots can help children with special needs

We interacted with present day technology mentors which include Himadri Jain(Co-founder Wibe.in), Girish Vengassery(Senior Engineering Manager Here Technologies), Siddhant Aggarwal(Program Coordinator Google), Anant Mendiretta(Product Manager Indiatimes Lifestyle Networks) and Sachin Kumar(Founder Bottle Openers, a digital company). We all interacted with the mentors from 7th June - 10th June, then on 11th June we submitted our idea(not final) for feedback by mentors and discussion on the following day. After receiving our feedback we improved our ideas and submitted our final ideas on 13th June. We received the results on 16th June and I came Third in the event. I received my e-certificate and prize money of ₹1000 on 18th June.
