**The long, harsh winter is over. Now artificial intelligence (AI) is a game-changer.**

AI is reaching an inflection point. The conversational AI chatbot ChatGPT garnered over 100 million users in just two months of its launch. Following the hype, Google and Microsoft were forced to slug it out with their chatbot-powered search engines Bard and Bing, respectively.

Yet to figure out how these AI developments will transform your lives and work? Will AI take away your job or even become self-aware? Regardless of whether you are an aspiring student of AI, an entrepreneur, a policymaker, a senior executive, an investor, or a decision-maker, this book is for you.

*AI Rising* will provide you with enough information and perspective to form your own opinion about AI and its applications in business, industry, and society at large. It will also help you understand and appreciate the progress that AI has made in India.
