

Hello Ranveer,

Congratulations! I am happy to inform you that you have been selected to receive an Undergraduate Research Experience award for this summer/fall 2021.

The project assigned to you is 'Food system modeling' with Dr. Laila Cure.

You are **required to attend** an '**Intro to Research**' training on **Tuesday, May 25** (*tentative* time, 9am-1pm) through zoom.

You are also required to meet with your mentoring faculty to obtain additional information about the project so that you can **submit a proposal** including the project's **objectives, need/motivation/significance, anticipated tasks/methods and budget (supplies list and cost and student salary)**.

Later this week, you will receive a link from Linda Manfull where you will **submit your final proposal by May 23**. You should write your proposal first, then copy and paste your answers on the link using the categories listed above.

Make sure the **total budget** is **\$4,000** after adding the supplies and materials (maximum \$500) and the student salary (minimum \$3,500). You should work with your faculty to determine the supplies needed and their cost.

Once you complete the proposal on the link, you will be able to download a PDF. You must **share your final proposal with your faculty** as they will be asked to confirm it.

Please contact me if you have further questions. Congratulations again and best of luck with your finals!

Ana G. Lazarín, M.Ed.
